Passed audits (23)

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content. Background and foreground colors do not have a sufficient contrast ratio. Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader. ▲ Links do not have a discernible name Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover.
